RE: Docket MM 99-325 (IBOC Digitalization)

I am writing in concern that the Big Broadcasters, lead by the National Association of Broadcasters (NAB) are pressuring the Federal Communication Commisssion (FCC) to *force* a standard for "Digital Audio Broadcasting" (DAB) that calls for the "mandatory sunseting" (prohibition) of analog FM broadcasting.

DO NOT LET THIS OCCUR!!! Let the public decide if digital radio is worth the sacrifice of money and programming values! We want a choice, not the same old homogenized corporate radio stations.

Help America join the proven world standard for Digital Audio Broadcasting: Eureka 147. Let's look out for the interests of the people here, the market, the public, not the interest of a few gigantic profit-driven corporations. Radio belongs to you, me, and our grandchildren. Not to the CEO's and controlling shareholders of a few big media and telecom companies. Leave the FM Dial FM. Help us get more stations, more choice, more freedom.

Sincerely,  
Philipp E. Meyer
